

DR.WATSON

Who is Dr. Watson

Who we are

- An independent medical service with a team of doctors who question the validity and objectivity of evidence surrounding injury claims.

How we do it

- Medical review service: our team of Doctor's question the medical evidence provided for any claim and prepare a concise report. The report provides Part 35 Questions to experts and/or Part 36 wording.
- Medical notes service: We retrieve medical notes from solicitors where they are holding information from our clients.

Our difference

- We are unbiased, independent doctors.
- We review medical reports and only provide recommendations if we are certain that the evidence is exaggerated or flawed.

What we do

Our service is a holistic approach that helps manage all medical aspects of an injury claim.

We deliver medical clarity

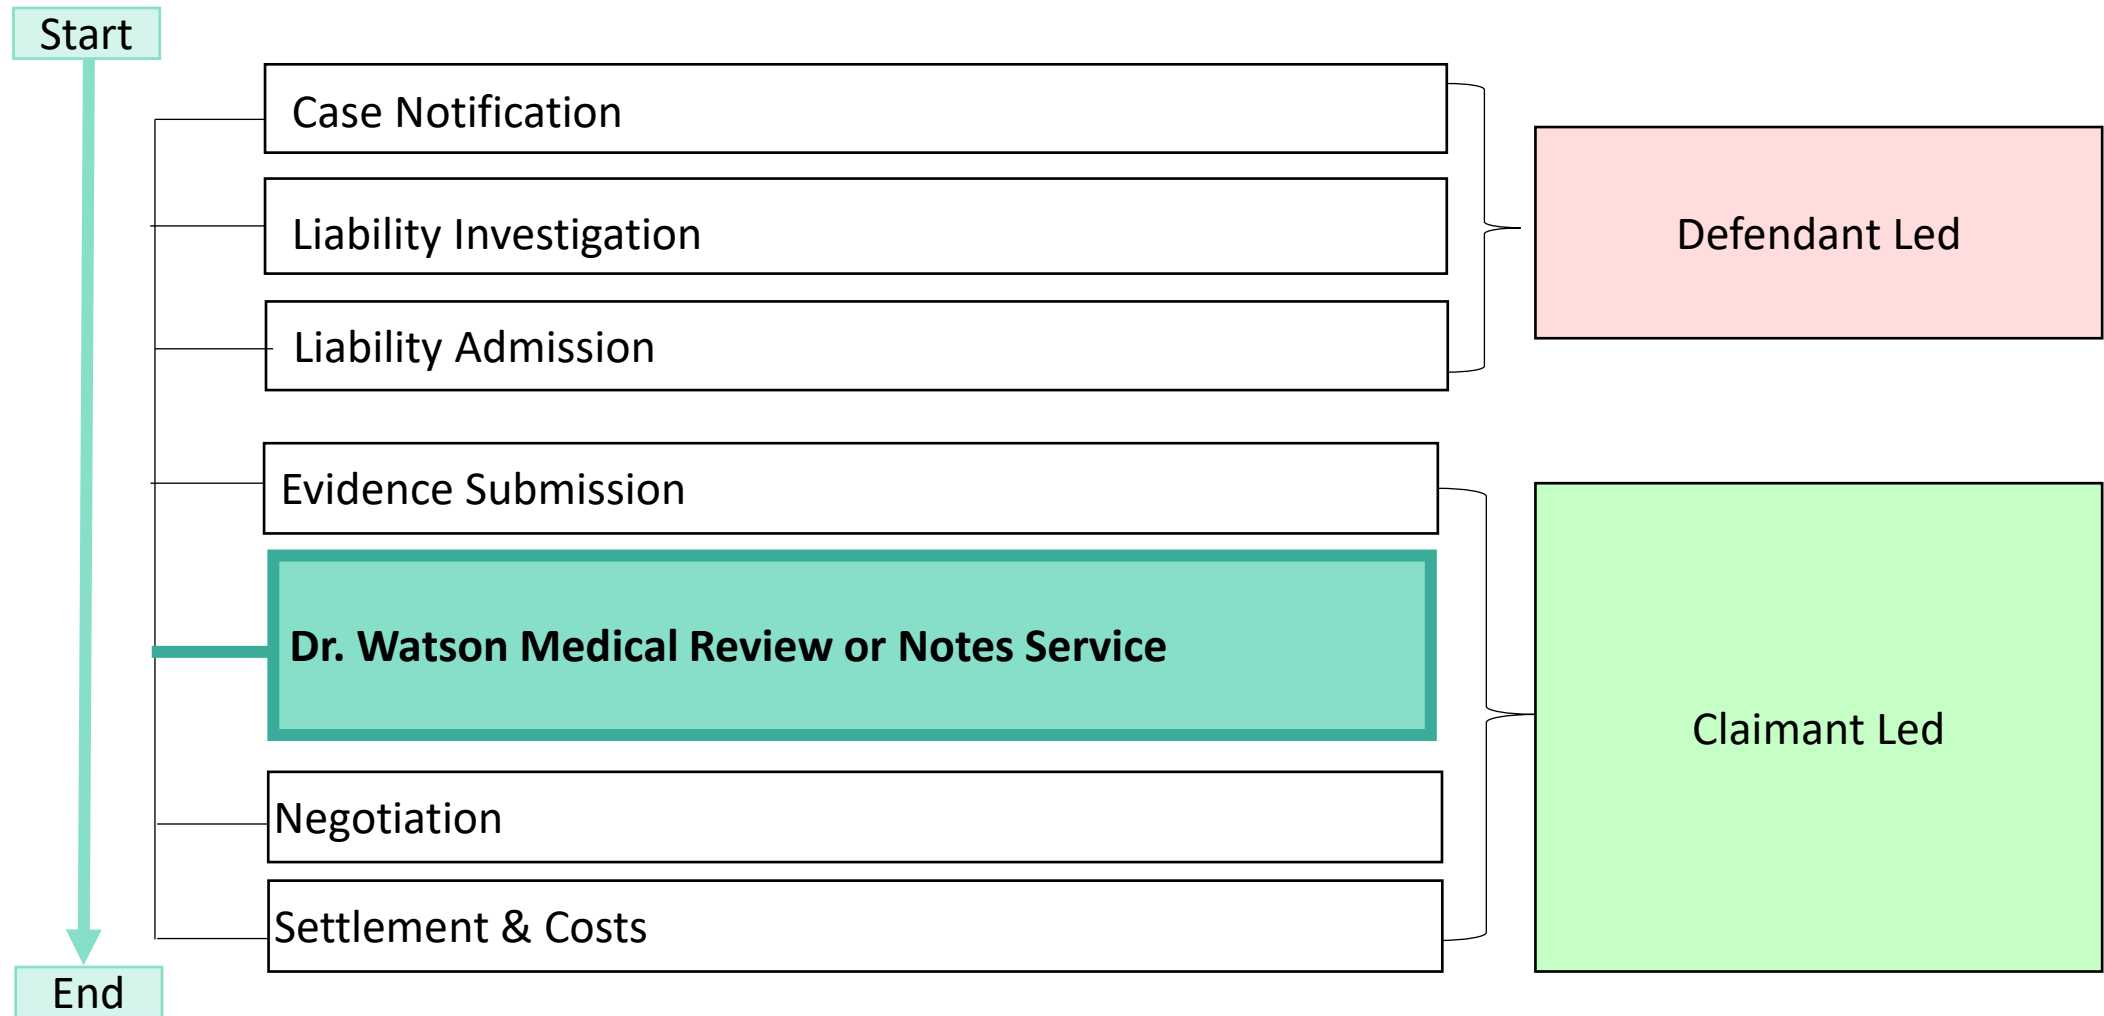

We facilitate early settlement

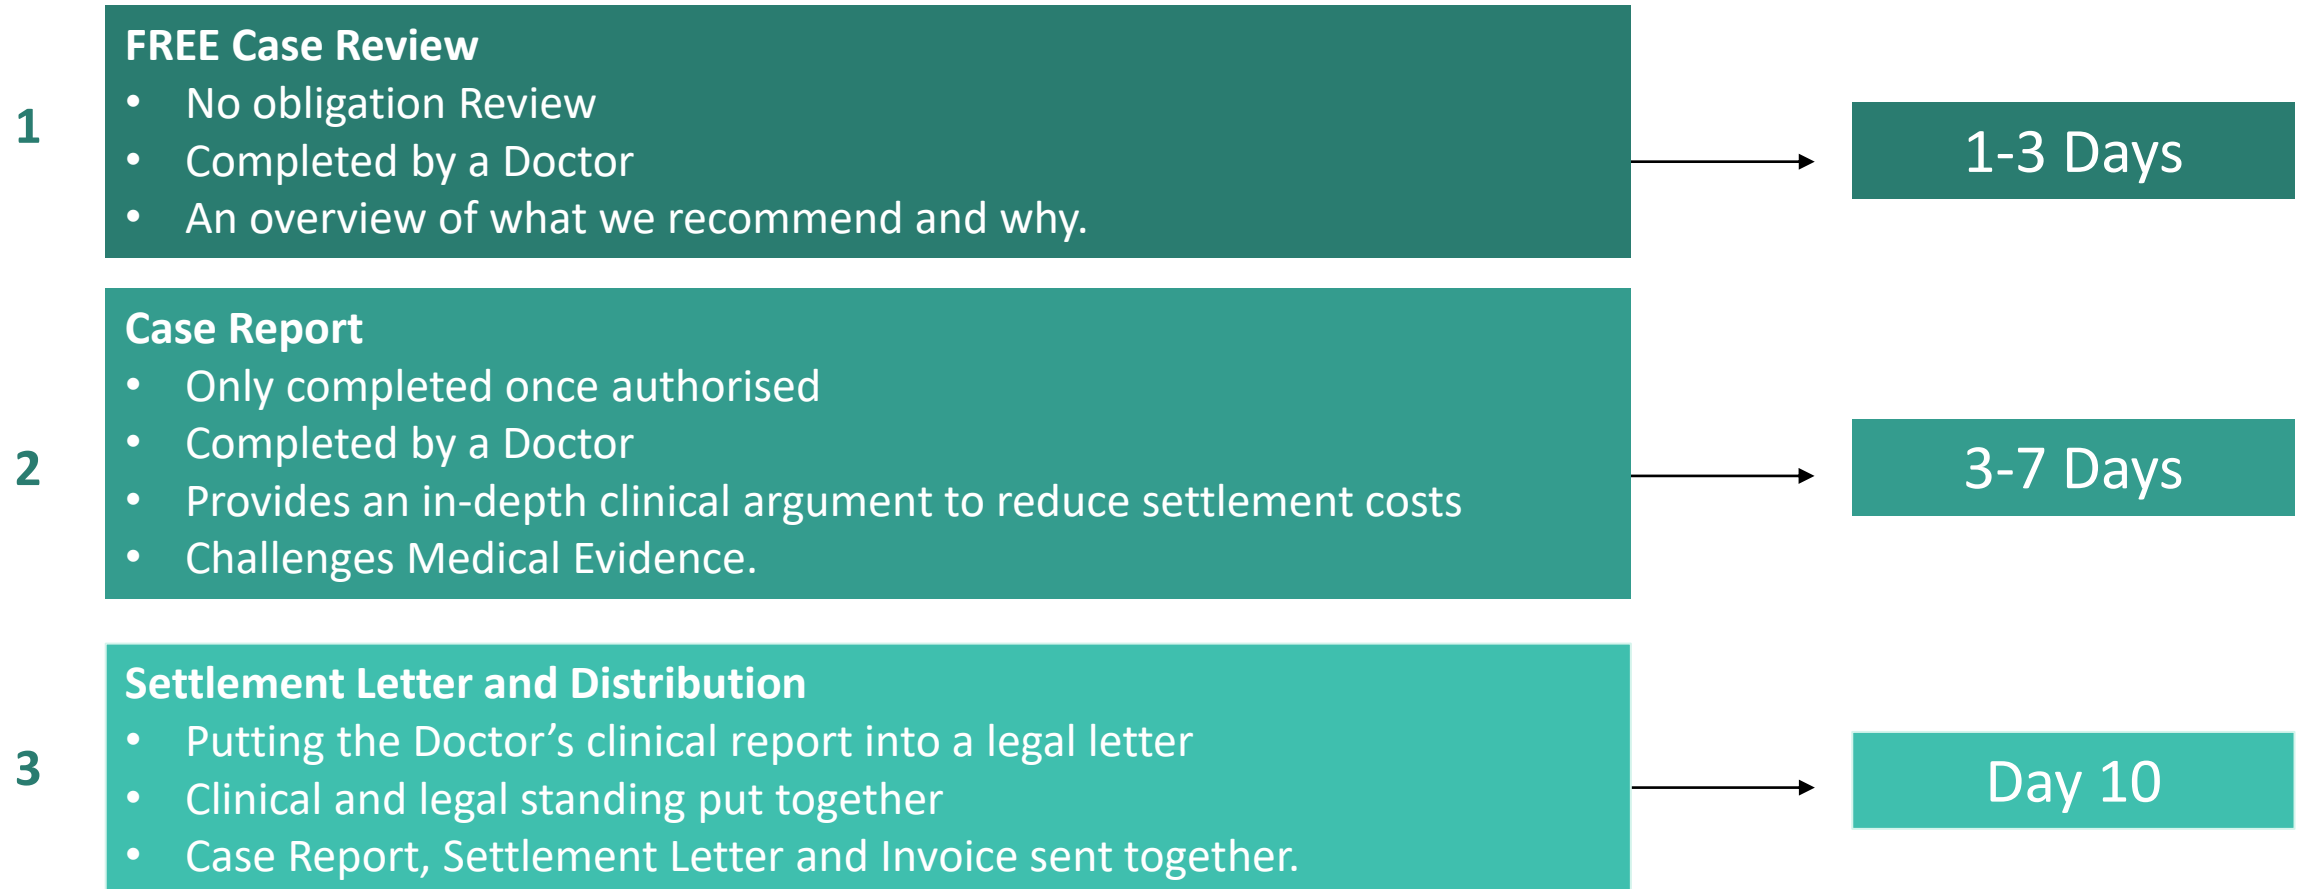

We reduce costs and settlement values
